

## *Building & Painted*

Hulamin (Pty) Limited supply a wide range of superior flat building and painted products for the manufacture of roofs, gutters, fascias, panels, components, cladding, ceilings, and many more, limited only by your imagination.

### ▶ Milltech

### ▶ Color-Tech 4

Color-Tech G4 employs the very latest Generation Four paint technology - hence the G4 suffix. The coating paints are based on polymer chemistry, which, over the past 10 years, has been progressively developed and dramatically improved in its durability and colourfastness. Generation Four includes combinations of super-durable polyesters, polyurethanes and high-grade, halogen-free polymers, together with the world's best pigmentation technology.

Benefits:

Whether it's ultimate environmental acceptability, great weathering resistance and durability, incredible design flexibility in colour and gloss level, superb adhesion for overpainting, ease of fabrication, excellent cost-effectiveness or the good abrasion resistance you require, Color-Tech G4 has it all... and more! In the latest surveys of architectural trends worldwide and designers are looking for wider colour ranges and more innovative finishes. Color-Tech G4 offers a unique and dynamic range of colours and finishes, created to give the designer the freedom of expression to use a full palette of opportunity, in a range of colours and finishes. Hulamin (Pty) Limited has harnessed the latest well-proven paint chemistry and coating equipment and developed Color Tech G4 which offer a tough hardy product ready to weather the harshest climatic conditions the world can offer. The ability to endure such harsh conditions is a result of the optimization of Color-Tech G4's properties of corrosion resistance, surface toughness and flexibility and UV and abrasion resistance. Color-Tech G4 truly represents the logical combination of designers' requirements, captured in a single product.
